About Me

- Full-stack developer and media buyer specialist with over 4 years of experience building robust, scalable web applications using modern technologies like React, Next.js, Node.js, and TypeScript. Skilled in both front-end and back-end development, with a strong understanding of UI/UX principles, responsive design, and performance optimization. In parallel, I bring over 5 years of hands-on experience in digital marketing—mastering SEO, Meta Ads, content strategy, and social media management. I bridge the gap between technical development and performance marketing to craft high-converting digital experiences that not only function flawlessly but also drive measurable business results. Passionate about building user-focused products, optimizing marketing funnels, and staying ahead in both the tech and marketing landscapes.
